Advanced septic testing and inspections 24-hour results

Independent and conclusive

Eco Logic does not remediate or repair septic systems. This means we remain a completely independent and neutral advocate for the state of your septic system.

About our septic testing services:

Our process includes the use of a highly advanced camera snake which allows us to perform a complete visual inspection of all components throughout your system.

We deliver nothing but the facts resulting from our thorough and diligent inspection and evaluation so **give us a call today**.
